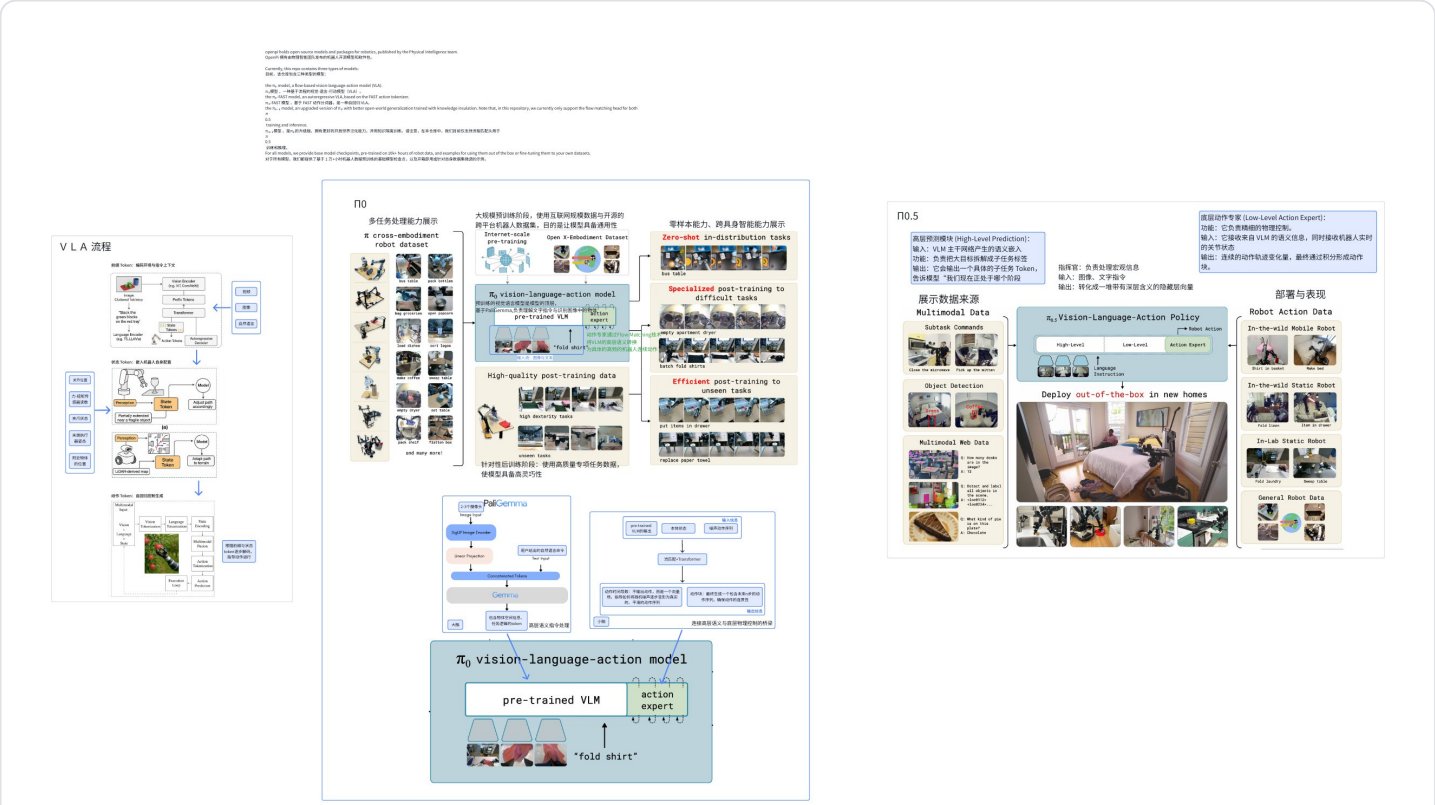
# VLA



V L A 流程
π0
多任务处理能力展示
π cross-embodiment robot dataset
大规模预训练阶段，使用互联网规模数据与开源的跨平台机器人数据集，目的是让模型具备通用性
Internet-scale pre-training
Open X-Embodiment Dataset
π0 vision-language-action model
pre-trained VLM
action expert
"fold shirt"
High-quality post-training data
针对性后训练阶段：使用高质量专项任务数据，使模型具备高灵巧性
零样本能力、跨具身智能能力展示
Zero-shot in-distribution tasks
Specialized post-training to difficult tasks
Efficient post-training to unseen tasks
π0.5
展示数据来源
Multimodal Data
Subtask Commands
Object Detection
Multimodal Web Data
π0.5 Vision-Language-Action Policy
High-Level
Low-Level
Action Expert
Deploy out-of-the-box in new homes
部署与表现
Robot Action Data
In-the-wild Mobile Robot
In-the-wild Static Robot
In-Lab Static Robot
General Robot Data
π0 vision-language-action model
pre-trained VLM
action expert
"fold shirt"
